

Electronic Services

Driving business efficiencies through web-based applications

Information Exchange that is Efficient, Easy and Automated

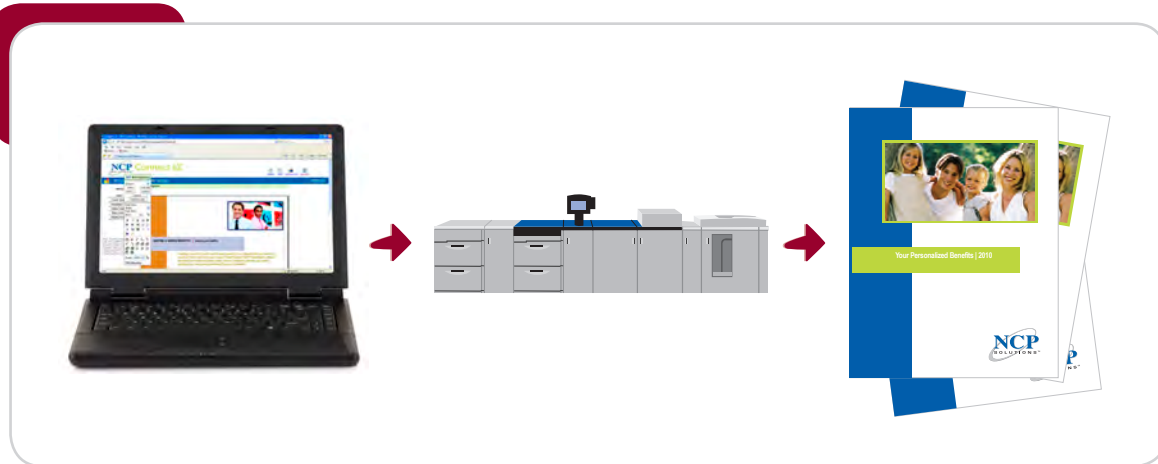

At NCP, we have answered our clients' need for relevant, easy-to-access information by developing automated, web-based tools that link operational and enterprise resource planning (ERP) applications directly to production data – greatly enhancing our clients' daily interactions with us.

These powerful web-based tools not only improve operational effectiveness, but also drive efficiencies. Our Web-to-Print and Collaborative Document Management applications support both document creation and modification, allowing our clients to keep pace with changes driven from inside or outside of their organizations. In addition, our online Portal provides clients with the ability to view document images, track production, approve and release jobs, create management reports, manage inventory and receive electronic invoices.

Automate the Delivery of Highly-Effective Customer Communications

Web-based document composition and production management are just some of the features you get with NCP's Web-to-Print solution. Internally developed and operated, this ASP based system enables organizations to transition away from manual processes, creating a pathway to business automation and efficiency by allowing you to:

- Customize and personalize collateral using your virtual library of templates, photos and graphics
- Upload data to create real-time direct mail applications
- Proof and approve online
- Use credit cards or corporate purchasing cards for order processing

Keep Pace with Change through Online Document Editing and Collaboration

It's simple. Document owners need a system for the management of letters, notices and other transactional communications. These mission-critical documents are constantly changing and you need them updated today and in production tomorrow.

NCP's web-based change management and collaborative authoring tool enables document owners to directly compose, revise and approve content within document templates that will:

- Speed time to market
- Provide transparent and auditable change control & approval processes
- Reduce application support and maintenance costs
- Reduce risk of forms obsolescence

Next Generation Customer Information System

Our client Portal presents operational based information in real-time, 24 hours a day, seven days a week in a user friendly web interface. Built on Oracle Fusion Middleware and Portal Technology, this new architecture provides efficient, self-service interfaces to critical production information and content. And it's flexible. Portal's administrative functions allow corporate administrators to not only control, but audit user populations. Portal already provides advanced features not found in current systems today and will be further developed to stay one step ahead of client requirements.

- ### Delivering Value Across Your Enterprise:
- Monitor workflow from file submissions, jobs in production, jobs completed to rejects and more from a convenient Dashboard interface
 - Audit user population and performance metrics through standard & ad hoc production reporting
 - Link directly to USPS® to track the status of inbound and outbound mail, monitor lockbox performance and improve cash flow
 - Validate return file uploads including AFP files or Electronic Return Receipt
 - Manage accounts payable with invoices linked directly to production data contained in Portal for immediate validation of charges
 - Control jobs requiring online review and production release. Users can approve, hold, pull and re-sample work from their desktop
 - Enhance customer service with PDF images of your printed statements available for download, print, email or direct connect to consumers

Go Paperless

Electronic Bill Presentment and Payment (EBPP) accelerates the collection process by delivering invoices to customers faster and by enabling them to pay electronically. NCP offers a fully outsourced EBPP solution that enables you to adopt state-of-the-art eBilling, giving your customers the convenience to receive and pay bills online through your web site.

Our Electronic Bill Presentment and Payment solution:

- Improves cash flow
- Automates payment processing
- Reduces postal expenses
- Optimizes customer touch points
- Supports sustainability efforts

Further enhance your document delivery with additional print, mail and marketing services:

Marketing Communications

- Postcards & One-to-One Marketing
- Collateral Management
- Print-on-Demand

Mail Services

- Address Hygiene & Address Updating
- Mail Tracking
- Inkjet Addressing
- Return Mail Processing

Transactional Communications

- Statements & Invoices
- Payment Coupon Books
- Checkletters & Convenience Checks
- Letters & Compliance Documents

About Us

For over 35 years, clients have relied upon our industry-leading expertise to optimize the effectiveness of their critical business communications. Leaving nothing to chance, NCP operates two separate production facilities where accuracy, security and reliability serve as the cornerstone of service delivery; freeing clients to focus on core business needs. Let us demonstrate how our advanced solutions can adeptly address your communications challenges.
